

Environmental Policy

“Our workers are our greatest assets; our products are our proudest achievements; the health and safety of our employees, our customers, the public, and the environment are our highest priority.”

Bedoukian Research, Inc. (BRI) feels strongly about protecting the environment and recognizing the needs of the local community. BRI strives to exceed the requirements for compliance with all Federal, state, and local environmental and health regulations, as well as those of industry trade organizations and national standards organizations.

BRI is committed to the health and safety of our employees, customers, our community, and our planet. We ensure resources are provided to maintain the quality of the environment and to honor our commitments to employees, neighbors, customers, and vendors as a dedicated participant in both local and industry organizations to promote the well-being of the industry and of the public.

Our commitment to protection of the environment includes:

- Sustainable use of resources
- Responsible sourcing of materials
- Monitoring and measuring our environmental footprint
- Reduction and recycling of waste streams

All activities, products, and services are considered in our commitment to continuous improvement of our operations. We value and engage with the communities in which we serve.
